MISSION

To elevate the quality of research in Biological Sciences and Healthcare engineering in North-East India

- NECBH invites high quality research proposal in the areas of biological sciences and health care engineering. Faculty members/Scientists/Engineers working in universities, academic/research institutions of North East India ONLY are eligible.
- NECBH will initiate and setup NE TWINNING project grants with young faculty member in different institutions of NE involving one or more Indian Institute of Technology Guwahati (IITG) faculty as collaborating partner(s).
- This scheme envisages utilization of modern research facilities at the soon to be established Centre for Excellence in IIT Guwahati for achieving the objectives of the NECBH.
- Thus the NE researcher not only benefits from the one to one interactions with Co-PI in IITG, but also from conducting experiments at state of the art facilities in Centre for Excellence at IIT Guwahati to jointly.

Main Objectives:

- The NE scientists through interactions shall acquire expertise in cutting edge research in biology and healthcare Science with mutual exchange of knowledge and experience.
- Young students working with NE scientists will acquire knowledge and expertise in carrying out research with modern day equipment which can immensely benefit them in their future careers.
- The overall research output from NE region will receive a major boost in terms of quality which is very much needed.
